

**Listing of Claims:**

1. (currently amended)      A photographic article comprising a base material carrying at least one layer comprising a photographic image formed by combination of dyes formed from couplers ~~wherein areas of said photo image are colored without dyes formed by couplers~~ wherein an area of said at least one layer carrying a photographic image is overprinted, in registration with said photographic image, with ink.

2. (original)    The photographic article of claim 1 wherein said base material has a non-neutral color.

3. (canceled)

4. (currently amended)      The photographic article of claim 3 ~~1~~ wherein said overprinting is in low density areas of said photographic image.

5. (original)    The photographic article of claim 2 wherein said base material comprises indicia.

6. (original)    The photographic article of claim 5 wherein said indicia comprises print.

7. (original)    The photographic article of claim 5 wherein said indicia comprises an image on said base.

8. (original)    The photographic article of claim 1 further comprising an adhesive layer below said base.

9. (original)    The photographic element of claim 8 further comprising a strippable liner attached to said adhesive layer.

10 - 11 (canceled)

12. (original) The photographic article of claim 10 wherein said fiducial mark comprises a topographical difference of said photographic article.

13. (original) The photographic article of claim 7 wherein said image comprises a repeating pattern.

14. (original) The photographic article of claim 13 wherein said repeating pattern comprises a machine-readable pattern.

15. (currently amended) The photographic article of claim ~~3~~ 1 wherein said printing ink has a dot gain of less than 20%.

16. (currently amended) The photographic article of claim ~~3~~ 1 wherein said printing ink has a dot gain of less than 10%.

17. (currently amended) The photographic article of claim ~~3~~ 1 wherein said printing ink mordants into the upper layer of said photographic image.

18. (original) The photographic article of claim 1 wherein said areas of said photographic image are covered by a printed sheet.

19. (original) The photographic article of claim 18 wherein said printed sheet further comprises an environmental protection layer for said photographic image.

20. (original) The photographic article of claim 1 further comprising magnetic recording materials.

21 – 25 (canceled)

26. (currently amended) A method comprising providing a base material, coating said base material with at least one layer comprising silver

halide and dye-forming coupler to form an imaging element, exposing said imaging element, developing said imaging element, recovering an image material, overprinting a portion of said image material, in registration with said photographic image, with ink.

27. (original) The method of claim 26 wherein said over printing has a dot gain of less than 20%.

28. (original) The method of claim 26 wherein said over printing has a dot gain of less than 10%

29. (original) The method of claim 26 wherein said ink comprises dye based inks.

30 – 34 (canceled)
